

# Phases of Change X Communication Feedback Loop of Virtual Engagement

## Assess the Status Quo

Learn about the current experiences of system professionals and community members with your protocol.

### Consider:

Are there gaps in services?

Is there a missing perspective of a population?

Is anyone being mis-served by the current protocol?

## Make the Change

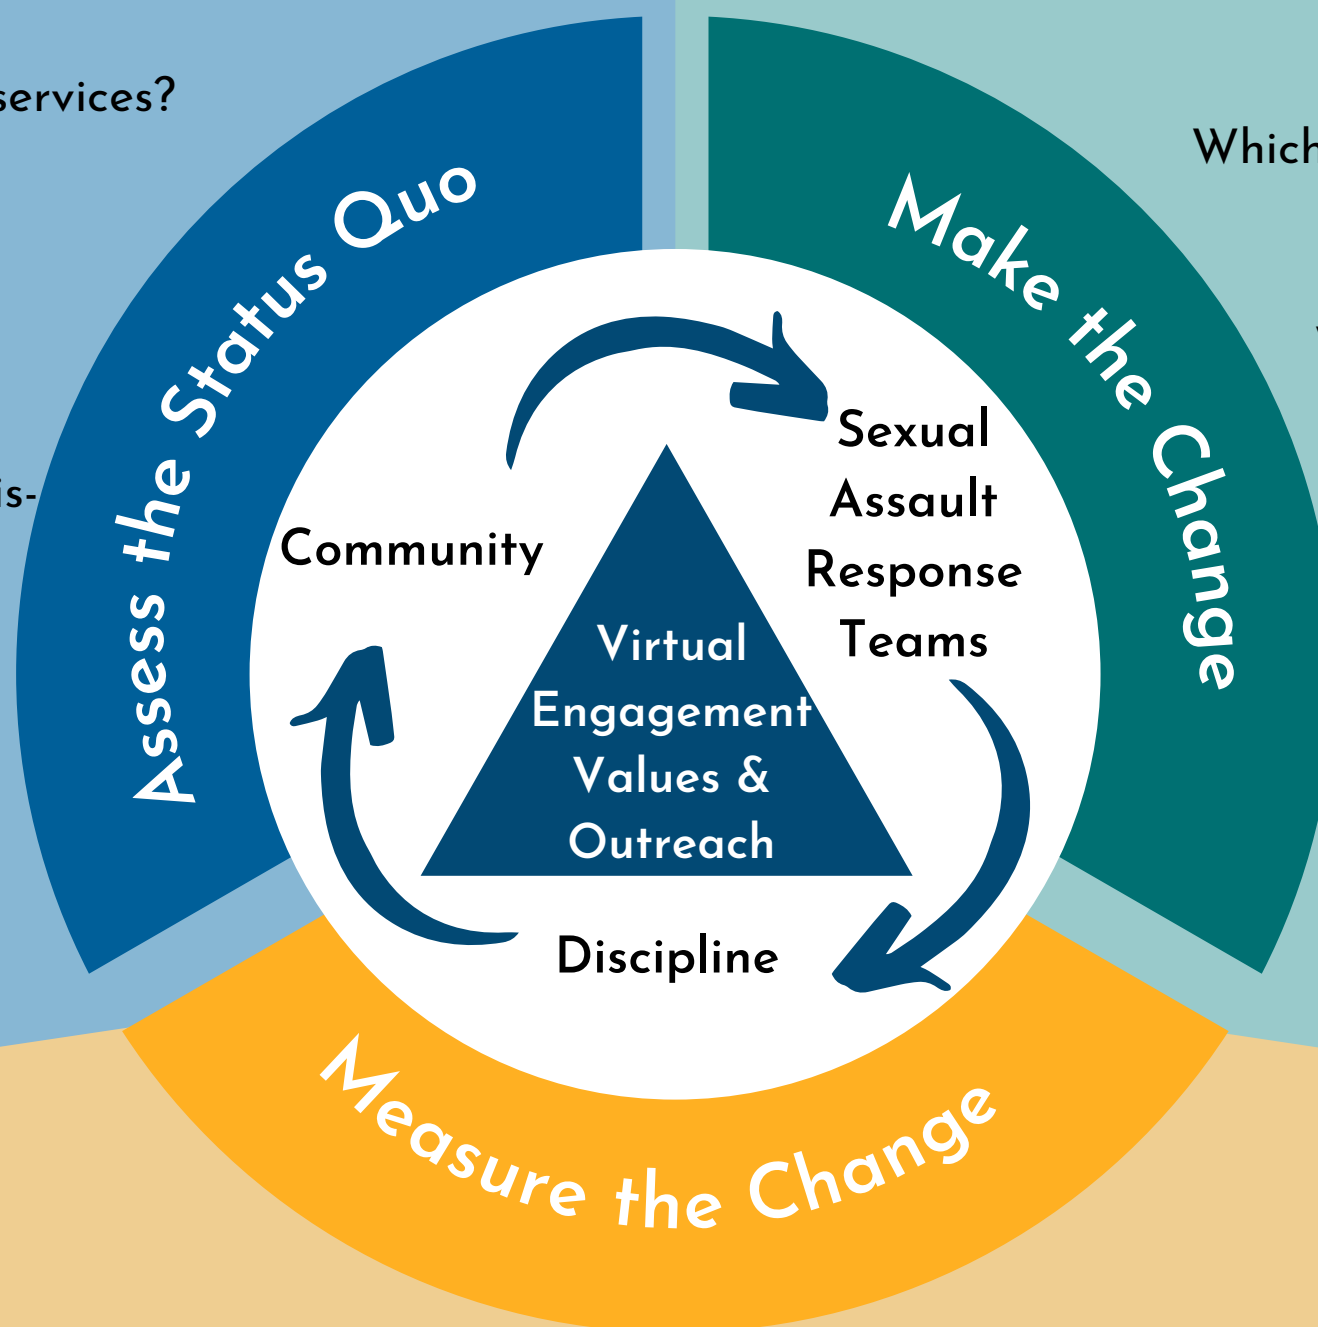

Use the "status quo" to inform places for improvement within the team. This will help identify where the greatest need for virtual engagement.

### Consider:

Which of our practices can be adjusted?

Who can we partner with to make this change??

What platforms can help us reach our goals?

## Measure the Change

Check the effectiveness of the changes made. Conduct evaluation through data collection, hosting community conversations, and connecting with system partners.

### Consider

Are our efforts being implemented in the way they are intended? How do we know this?

What current data is out there to direct our efforts?

What is each discipline experiencing as a result of our efforts and changes made?
